Cynoden dactylon x *Cynoden transvaalensis*

Tahoma 31 is a warm season grass that is revolutionizing landscapes in Colorado. Tahoma 31 is the most water efficient grass available with lower water requirements than even buffalograss or blue grama. Tahoma 31 is a beautiful grass that will save 50%-70% on water with up to 80% less mowing. Tahoma 31 creates a new standard in landscape water use efficiency and low maintenance. As the only Bermudagrass hybrid with the consistent ability to survive Colorado front range winters, Tahoma 31 is the future of sustainability in Colorado.

Features:

- 50%-70% lower water requirement**
- Exempt from all grass coverage restrictions!**
- Fine textured with great color
- Good traffic tolerance
- Ideally suited for warm locations under 7000' elev.
- Less water use than a typical xeriscape
- Tolerates some shade
- Up to 80% less mowing
- 50 % less fertilizer

Ideal Uses:

- Schools
- Residential Lawns
- Parks
- Streetscapes
- Commercial Properties
